

HAMZA SAHQANI

Industrial IT Student

Projects:

<https://github.com/MHamzaS45>

ABOUT ME

Enthusiastic software and game developer, with a strong interest in AI agenting and process automation. I am very passionate about AI, and am eager to partake in opportunities that would enhance my skillset for it. I am also interested in further exploration of integrating AI in the software development pipeline.

EDUCATION

LAB University of Applied Sciences, Lähti, Finland

Aug. 2025 - June 2029

B.Eng.in Information Technology, Industrial

Coursework: Programming (C, Python, C++), Object-Oriented Programming, Web Development (HTML, CSS, JavaScript), C#, Embedded Systems, Data Structures & Algorithms, Machine Learning & Neural Networks, Discrete Mathematics, Engineering Mathematics, Industrial Physics, DevOps & CI/CD, Containerization (Docker), Virtualization & Network Security

Professional Skills:

Agile/Scrum Development Practices, Engineering Discipline,

WORK EXPERIENCE

IT Contracted Project, Lähti, Finland

March 2026 - present

Undisclosed Organization

Currently contracted to work on a project related to my study field.

CERTIFICATIONS

AI & Cybersecurity by University of Turku, Finland:

Learnt significant information about and applications of AI & Cyber-security. [\[CERTIFICATE\]](#)

CS-AJ1030 Introduction to LLMs by Aalto University :

Understand LLMs, how data powers modern AI and prompt engineering

Game Design and Development with Unity Specialization

A specialization offered by Michigan State University. [\[Certificate\]](#) [\[2D SHOOTER PROJECT\]](#) [\[SOLAR SYSTEM PROJECT\]](#)

Automate the Boring Stuff with Python Programming

Learnt the basics of Python in the IDLE engine and how to use it for purposes such as web scraping, file reading etc. [\[CERTIFICATE\]](#)

SKILLS

Programming: Python (OOP, Data Analysis and Mining), HTML5-CSS3-JS, TypeScript, ReactJS (Scalable Web Dev), C# (Data Structures & Algorithms, Unity3D)

Data Libraries and Processing: Polars, Pandas, NumPy, Polars, Seaborn, Folium (geospatial analysis)

Machine Learning: Algorithmic Problem Solving, PyTorch, Computer Vision (MediaPipe)

Data Handling & Integration: API Integration (Mistral AI, Gemini),

Workflow & Tools: Automation: Google CLI, Git (Version Control, WorkTrees)

Project Management: Agile/Scrum Practices, Software (Jira ticketing, Teams)

Professional Skills: Communication, Collaboration, Technical

VOLUNTEERING

ENGIN English Tutor

ENGIN | March 2026-Present

KhyberLahti 2026 Event Volunteer

LahtiSec | March 2026
